

**THE TYRE WITH
PREMIUM
QUALITIES**

MANUFACTURER OF LANDSAIL: SENTURY TIRE

- Supplies more than 20 million car tyres a year worldwide.
- Holder of the CTSOA Certificate: Certified to supply aircraft tyres to Boeing for its 737 aircraft.
- Proven, very high quality level at budget prices.
- Delivers factory tyres in Asia for e.g. Audi and Geely (owner of e.g. Volvo, Polestar & Lotus).
- Very wide range available in all categories and in all seasons.

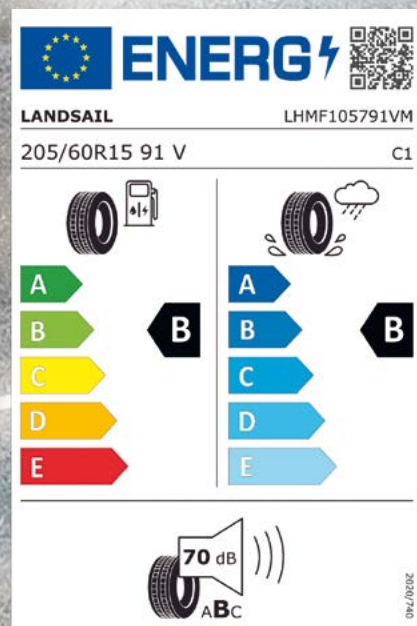

RAPIDDRAGON

- Larger grooves for better water drainage.
- Greater contact with the road because of smart tread pattern.
- Special pattern reduces tyre noise.

15 TO 21 INCH

RAPIDDRAGON

RAPIDDRAGON SUV

- Advanced technologies reduce turbulence and minimise drag.
- Excellent performance on a variety of terrains, made for SUVs.
- Larger grooves for better water drainage

16 TO 22 INCH

LS588

- The LS588 is characterised by optimal driving and braking behaviour on dry and wet roads.
- It's special 3D design greatly reduces the risk of aquaplaning.
- Special 3D zigzag sipes greatly shorten braking distances.

16 TO 22 INCH

LS388

- The four wide longitudinal grooves ensure fast and effective water drainage while maintaining grip on wet surfaces.
- An optimised tread for mid-range sporty tyres.
- The special shoulder design improves roadholding when cornering.

13 TO 18 INCH

LS188+

- Improved grip and aquaplaning resistance.
- Improved stability and handling, also on dry roads.
- Optimised alignment for superior noise reduction.

13 INCH

LSV88+

- Special micro grooves in the central surface increase road contact, ensuring excellent grip.
- Three wide longitudinal grooves for efficient water drainage, this prevents aquaplaning.
- Deep wide grooves ensure increased mileage.

14 TO 16 INCH

CT6

- Special micro grooves in the central surface increase road contact, ensuring excellent grip.
- Three wide longitudinal grooves for efficient water drainage, this prevents aquaplaning.
- Deep width grooves ensure increased mileage.

13 & 14 INCH

4-SEASONS 3

- 77% more sipes – For excellent grip and improved performance on snow.
- Deep V-shaped grooves – Minimise the risk of aquaplaning by quickly dispersing water.
- Advanced tread design – For quieter, more comfortable, and even tyre wear.

14 TO 19 INCH

4-SEASONS 2

- Optimal traction and control on snow-covered roads.
- 3D sipes provide increased grip on slippery road surfaces.
- Features 3-Peak Mountain Snow Flake (3PMSF) symbol, making it compliant with European winter tyre legislation.

14 TO 19 INCH

4-SEASONS

- Features 3-Peak Mountain Snow Flake (3PMSF) symbol, making it compliant with European winter tyre legislation.
- A passenger car tyre suitable for all weather conditions.
- Dual compound tread lets you carefree driving in all seasons.

13 TO 18 INCH

4-SEASONS VAN 2

- Special micro grooves in tread ensure excellent grip and performance in winter conditions.
- Features 3-Peak Mountain Snow Flake (3PMSF) symbol, making it compliant with European winter tyre legislation.
- Suitable for vans.

15 TO 17 INCH

AT-TRAK

- The irregular lug design reduces noise and improves grip on snowy roads.
- Robust rubber compound and reinforced blocks ensure long tyre life.
- Four wide main grooves can channel water and mud effectively.

15 TO 19 INCH

WINTER LANDER

- The Winter Lander is a winter tyre developed for passenger cars.
- The silica rubber compound ensures that, even at very low temperatures, the tyre remains supple and has maximum grip.
- The rough rubber surface (3D technology) creates extra grip.

13 TO 19 INCH

WINTER STAR

- Small tread openings in the tyre's shoulders prevent aquaplaning.
- Silica rubber compound ensures flexibility even at very low temperatures
- A winter tyre developed for SUV, Pick-up and Crossover.

16 TO 18 INCH**SNOW STAR**

- Lateral grooves deliver high grip and steering stability.
- Central longitudinal groove and 2 zigzag longitudinal grooves can quickly shed water and snow.
- Three wide width grooves for efficient water drainage and extra grip during braking and steering.
